

Mindcoast has released version 2.0 of their grant management software, GrantWave. The new version adds numerous new, user-requested features including enhanced grant budget tracking (projected to actual) through grant amendments.

[PRLog \(Press Release\)](#) – Sep 09, 2008 – Pasadena, CA – Mindcoast has announced the release of version 2.0 of their grant management software, GrantWave. The new version adds numerous new, user-requested features.

In version 2.0, grant managers can take advantage of enhanced grant budget tracking (projected to actual) through grant amendments. "*The addition of the amendments feature stemmed from a user request*," said Sascha Koenig, Mindcoast co-founder. "*We were happy to add this new feature in version 2.0, as it allows GrantWave to more accurately address the grant management and reporting needs of our new and existing users.*" Amendments are automatically updated in grant templates as they are entered.

Version 2.0 also offers four customizable amount fields, additional checklist options, and a show/hide tabs feature, which allows users to view only the grant management sections relevant to their organization. "*We're driven every day to find out how to simplify and streamline grant management for our clients. User feedback has been critical in our ability to upgrade GrantWave and provide additional functionality. Constant dialogue with our users ensures GrantWave stays at the forefront of grant management systems,*" said Mr. Koenig.
