*"GrantWave V3 is a must have for anyone who is serious about successfully obtaining grant funding. The new financial module is user friendly and simplifies the task of building budgets and tracking expenses. Simple, organized layouts and reports help streamline multiple funding sources over different programs within an organization, preventing you from being under- or over-budget again. With it's robust grant management features, it also makes it a lot easier to apply for multiple grants and increase our chances for funding new programs."*

Patrick Callahan

*"Our organization applies for many grants from corporations, non-profit organizations, and foundations each year. Keeping track of contact information, deadlines, budgets, and previous submissions can be a daunting task. GrantWave has come to our rescue by providing order to our grant-making process. The software is very easy to use and contains many features that are applicable to our organization. It also saves us hours of time by providing a central database for all of our grant information; we no longer need to search through multiple filing cabinets to find the information we need. I would highly recommend this program to anyone that is seeking to really cultivate their grant program."*

Eric Lorico, Business Consultant

*"As a beta-tester for GrantWave V3 and someone new to GrantWave, I was interested to test drive the new Financial module. For Principle Investigators who work in larger institutions that utilize an overall financial accounting system, GrantWave is a simple way for PIs to track their own grants to assist them in the financial reconciliation process. I've seen some PIs use a checkbook register or other personal financial software like Quicken or Quickbooks as well, but GrantWave is designed for grant management and can do more than just organize the finances. Also, with its database capabilities, PIs can house all of their information in one easy to use program."*

Debbie Rew, Director of Fund Development

*"Grantwave has been very useful to our organization for tracking all the grants and associated reports. When I needed customized reports to generate for our board and executive director, Sascha was able to provide those fairly quickly. The new version is even better! The technical support has always been there when I needed it."*
