

Mindcoast provides more than just software to the nonprofit community. To enhance your development productivity, we also are proud to offer the following specialized services:

Schedule a web demo

You like what you've seen so far, but want to learn more about GrantWave? Do you want to see it in action for you and your colleagues to watch? Just [schedule a web demo](#) with us and we will demo GrantWave for you!

Custom Data Import

Want to use your existing organization, contact, and grantor data in GrantWave? For a limited time we will import your data for free with our GrantWave Platinum Package. Just provide us with your organization, contact and grantor lists in a csv-file (comma separated values), and we will import them into your GrantWave database. Your data will be kept confidential and will immediately be deleted after we send you the imported database.

Custom Report Design

While GrantWave includes numerous standard reports as well as a custom report generator, we know you may have more complex reporting requirements or may not want to spend your time and energy developing your own reports. Mindcoast can create custom reports for you and give you the template and instructions for running it when you need it.

Software Customization

Does your organization has specific requirements? We can customize GrantWave to fit the needs of your organization. We will work with you to create software that matches your specific requirements for enhanced grant productivity.

For an estimate on any of the above specialized services, please [contact](#) us.
